January 22, 1994

ASSISTANT STATE GAME WARDEN
STATE OF OKLAHOMA
DEPARTMENT OF NATURAL RESOURCES

Dear Mr. Cole,

This letter is in response to your request for information on guidelines, methods and other elements of biological assessments of the breeding birds

(1) 1994 EID Section 34 of 1994, Budget, Chapter One.

(2) 1994 EID Section 34 of 1994, Budget, Chapter One.

Dear Mr. Cole,

The Oklahoma Natural Heritage Inventory maintains a database on the distribution of rare species and their nesting and distribution in Oklahoma. We have prepared the following inventory, which is based on a review of all our data obtained by ENRS, OWR, OWRD, and OWRD's various field offices and derived from [page 98, Section 34 and 35]. These are listed on the attached table.

The breeding inventory database is the most accurate compilation available on the rare birds of Oklahoma, and it is used to identify specific locations or threats to rare species. This database can then be used for conservation and educational purposes or to assist in permitting, as long as specific information is required by the Division of Natural Resources or the Oklahoma Department of Wildlife Conservation, at which time we are available.

Thank you for the opportunity to respond to your request.

John L. Gandy
John L. Gandy
Division Coordinator

Mr. Charles Bern, USFWS Wildlife Biologist
